

MATERIALS

- Clay like Creall Therm soft
- White paper
- Phone
- Stop-motion app
- (Small) tripod

LEARNING OBJECTIVE

Get to know the entertaining function of media by making your own stop-motion film with clay.

BRING YOUR CLAY TO LIFE

1

Let the pupils install a stop-motion app on their phone or tablet.

2

Use a sheet of paper as a background: half is on the table; the other half can be put upright (e.g. against the wall). The children clay a figure themselves, for example an emoji.

3

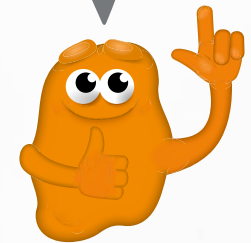

Let the pupils take photos. Before taking a new photo, they should move their figure a little bit.

4

Houd het eenvoudig om mee te beginnen.
Als je de figuren niet afbakt, kun je spelen met verschillende houdingen.

Let the children create the stop-motion film by merging the photos in the app.
