

# SUPER SALE

Good luck and have fun  
with this lesson!

## LESSON PLAN: SUPER SALE

- Age: from age 10
- Learning area: math
- Preparation time: 5 Minuten
- Duration: 2 x 30 Minuten

# SUPER SALE

## WHAT DO YOU NEED?

- A3 drawing paper
- Sticker paint, such as Creall Window colour
- Contour paint, such as Creall Window colour contour
- Transparent plastic sheets

## WHAT WILL YOU BE DOING?

Together with your classmates, you'll make a window display of offers.

# SUPER SALE

## STEP 1

Do you know what an offer is? If you look at the advertising brochure, what seems to you to be an interesting offer?

# SUPER SALE

## STEP 2

Think up your own offer. What would you like to sell? What is its old price? And with what percentage discount would you like to sell it?

Calculate the new price of your offer.

# SUPER SALE

## STEP 3

Draw the product you are going to sell. Put the old and the new price with it. Do you find that difficult? You can use an example from an advertising brochure.

Then you put your drawing under a plastic sheet. Trace the lines of your drawing with contour paint. Let the lines dry.

# SUPER SALE

## STEP 4

When the lines are dry, fill the drawing with the sticker paint. Let that dry again.

When your sticker is completely dry, carefully remove it from the plate. Stick your sticker on the window next to those of your classmates. The window has now become a shop window!
