

MATERIALS

- Sand like Creall Sculpt it!
- Sculpting tools like Creall Spatulas
- Pencils
- Paper
- Access to (online) sources on castle

LEARNING OBJECTIVE

Looking at (world) heritage and recreating it in your own style, showing knowledge about the heritage. Showing historical awareness in relation to cultural heritage. Answering a question about the past by looking for and researching (historical) sources. Developing your own knowledge about and insight into the rise of feudal society with manorialism and serfdom, knights, castles and crusades.

MEDIEVAL CASTLE

1

Divide the class in groups of 4 or 5 students. Have the students look for information on (knights and) castles online or teach them on this subject.

2

The students will use this new knowledge to design their own castle. Make sure they think about who lives in the castle and what functions they have.

3

Once the design is ready, they will make a scale model with sand. What problems do they encounter? How do they solve these problems?

4

Once the castles are ready, each group will present their castle. They should tell the class about the information they found, and how they used it for their design.
